

8-1 Angle and Angle Measure Notes

General Angle in Standard Position	Various Types of Common Angles		
<u>angle</u> → _____	Positive Angles	Negative Angles	Quadrant Angles
	 <p style="text-align: center;">rotation is _____ arrow is _____</p>	 <p style="text-align: center;">rotation is _____ arrow is _____</p>	 <p style="text-align: center;">Terminal side falls on a. x-axis - _____ b. y-axis - _____</p>

<p>To convert from degrees ($^{\circ}$) to radians (π) → _____</p> <p>Convert given degree measure to radians:</p> <p>a. 45° → _____</p> <p>b. 300° → _____</p>	<p>To convert from radians (π) to degrees ($^{\circ}$) → _____</p> <p>Convert given radian measure to degrees:</p> <p>a. $\frac{\pi}{3}$ → _____</p> <p>b. $\frac{5\pi}{6}$ → _____</p>
---	---

Example 1: Draw each angle in standard position. Draw the arrow of angle's direction.

a. $\theta = 48^{\circ}$	b. $\theta = -212^{\circ}$	c. $\theta = 270^{\circ}$	d. $\theta = \frac{4\pi}{3}$	e. $\theta = -\frac{\pi}{6}$	f. $\theta = -\pi$
					

coterminal angles are angles that _____ (end in the same place)

To find a POSITIVE coterminal → _____ (if in deg) or _____ (if in rads)

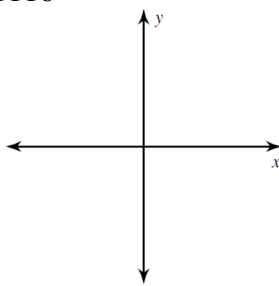

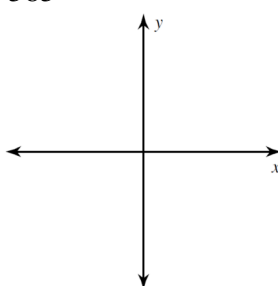

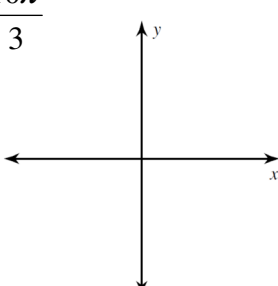

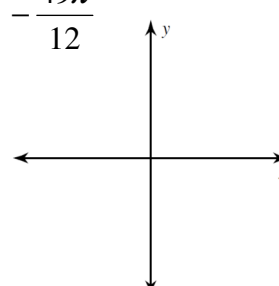

To find a NEGATIVE coterminal → _____ (if in deg) or _____ (if in rads)

Coterminal angles can contain _____

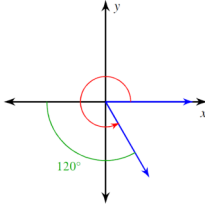

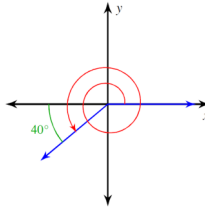

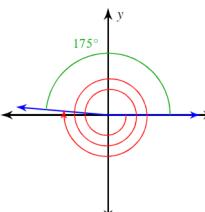

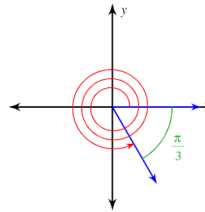

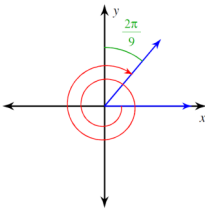

Example 2a: Find a positive and negative coterminal angle for the given angle θ .

<p>i. $\theta = 60^{\circ}$</p> <p>positive coterminal angle = _____</p> <p>negative coterminal angle = _____</p>	<p>ii. $\theta = \frac{7\pi}{6}$</p> <p>positive coterminal angle = _____</p> <p>negative coterminal angle = _____</p>
--	---

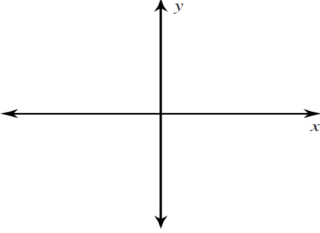

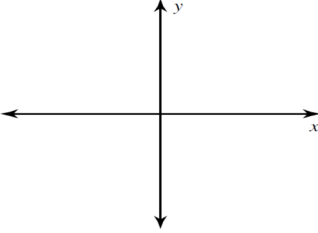

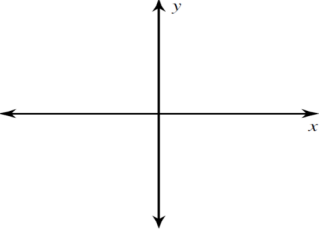

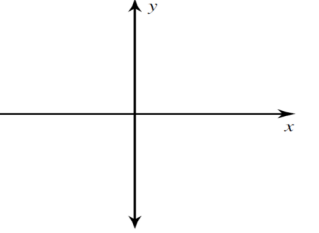

Example 2b: Draw the indicated angle. Make sure to include your direction and spirals if it goes around more than once.

i. 1116° 	ii. -585° 	iii. $\frac{10\pi}{3}$ 	iv. $-\frac{49\pi}{12}$ 
--	---	--	--

Example 2c: Find the measure of each angle using the given picture. Keep units consistent.

i. 	ii. 	iii. 	iv. 	v. 
--	---	--	---	--

A **reference angle** is an angle θ' associated with angle θ where θ' is an _____ formed by the terminal side of _____

Angle θ Falls in QI	Angle θ Falls in QII	Angle θ Falls in QIII	Angle θ Falls in QIV
			
Formula: _____	Formula: _____	Formula: _____	Formula: _____

Example 3: Find the reference angle θ' given angle θ . Make sure angle θ is between 0° and 360°

angle θ	Quadrant θ Lies	Work to find θ'	Reference angle
a. 120°			
b. 53°			
c. 948°			
d. -765°
